Prepaid Metering Solutions

Complete solutions for body corporates, property developers and property management services

The Kryohm Platform

One platform to manage all your prepaid utility meters

The Kryohm Prepaid Platform offers a **comprehensive solution** for managing all your prepaid utility meters. With an intuitive interface, property developers can easily manage electricity, water, and gas credit vending, delivering a seamless experience for both management and tenants.

Our platform provides detailed credit purchase reporting and tenant self-service, ensuring efficient operation. Features such as online token vending and customizable pricing empower body corporates, providing full visibility over revenue and credit sales while enhancing the user experience for tenants.

Split Prepaid Electricity Meter

Advanced functionality for energy management

The **DDSY168-S Single Phase** split prepaid electricity meter offers advanced functionality for efficient energy management. Its **robust design** ensures reliable performance across various applications, making it ideal for body corporates and property developers.

Equipped with features such as tamper detection and **real-time communication**, this meter guarantees accurate billing and monitoring. The dual prepaid/postpaid mode enhances flexibility, catering to diverse tenant requirements while maintaining high standards of accuracy.

Split Prepaid Water Meter

Innovative design for smart management

The CA568-S Multi-jet STS Split Prepaid Water Meter ensures efficient water management for properties, featuring an innovative design that supports remote monitoring and user-friendly tenant interaction within a single platform.

With its robust construction and advanced communication options, the CA568-S meter delivers reliable performance, enabling body corporates and property developers to enhance **utility management** and streamline revenue collection effectively.

Prepaid Gas Meter

Flexible and User-Friendly Solution

The CA768 STS Keypad Prepaid Gas Meter offers a reliable solution for monitoring gas consumption, ensuring efficiency and convenience for property developers and body corporates seeking to optimize utility management.

With features such as long-lasting battery life and advanced connectivity options, this meter allows for seamless integration into existing utility management systems while providing purchase history access and tenant self-service capabilities.
